

# Project Spot Light

When the Holiday Inn & Suites decided to build their new Hotel in Lakeville, Minnesota they chose the toilet with the strongest, most powerful flush in its category, the GERBER Avalanche.

The owners wanted a toilet that delivered a maximum flush with a minimal flush noise level. They also wanted an Elegant slimline design with a Universal 17" height for ultimate comfort for their guests.

Also, due to the common plugging of toilets in many hotel rooms, the owners chose to use the Gerber Avalanche because of the exceptional performance from this gravity-fed toilet. The Avalanche flushes over a 1,000g of bulk waste. With an enlarged 3" flush valve and superior hydraulics, the Gerber Avalanche measurably outperforms any toilet the owners have used in the past. It's all the power and performance you could ask for in one low-maintenance, quiet machine.

All of the hotel rooms feature a 17" ErgoHeight design to ensure the utmost comfort.

## Project File:

**Job:** Holiday Inn & Suites

**Where:** Lakeville, MN

**Product:** Gerber Avalanche

**Model#** 21-828 bowl
